

Bin Zhou, MD, PhD

Professor, New Cornerstone Investigator, Chinese Academy of Sciences

Title:

Tracing the origins of *de novo* coronary collateral formation in cardiac repair

Short Biography:

Dr. Bin Zhou received MD from Zhejiang University School of Medicine in 2002, and PhD from Peking Union Medical College in 2006. From 2006-2010, Dr. Zhou did his postdoctoral fellowships at Boston Children's Hospital with Bill Pu. In 2010, Dr. Zhou became a professor at the Chinese Academy of Sciences. The major goal of his lab is to develop new lineage tracing technologies and apply them to understand better the origin, heterogeneity, and fate plasticity of cell lineages during organ development, regeneration, and diseases.
