

## Short Biography

Dr Wulan Anggrahini is a clinician-scientist in the field of cardiovascular medicine in the Department of Cardiology and Vascular Medicine, Universitas Gadjah Mada, Indonesia. She obtained her PhD in Cardiovascular Medicine from Kobe University, Japan, and trained cardiologist and interventional cardiology at Sardjito General Hospital, Indonesia; National Cardiovascular Center, Jakarta; and Apollo Hospital, New Delhi. She is currently a coordinator for the Cardiology Research Office in UGM and does her clinical and research work in the field of Pulmonary Hypertension, Congenital and Structural heart diseases, and heart disease in Pregnancy. Her research in PH aims to answer the factors related to the high incidence of pulmonary hypertension, especially those disproportionate to small congenital defects. She evaluates the clinical features, biomarkers, and the genetic background of patients for diagnosis as well as prognostication.
