

Tomofumi Misaka, MD, PhD

Dr. Tomofumi Misaka is an Associate Professor at Department of Cardiovascular Medicine and Department of Community Cardiovascular Medicine at Fukushima Medical University, Japan. He graduated from Yamagata University in 2004 and received his PhD from Fukushima Medical University in 2012. Following clinical training in cardiology, he conducted research at King's College London as a Research Associate and later a Research Fellow. His research focuses on translational cardiovascular science, exploring the molecular mechanisms of heart failure, multi-organ communication, clonal hematopoiesis, post-translational modifications, and epigenomic regulation. He serves as a Councilor of the ISHR Japanese Section and a member of the ISHR-U45 Young Working Group.
