

Dr. Atsuko Imai-Okazaki, M.D., Ph.D., M.P.H., is an Associate Professor at Juntendo University, Japan, and an Adjunct Professor at McGill University, Canada. She received her medical degree from Kobe University, a Ph.D. in medicine from Osaka University, and a Master of Public Health from the University of Manchester. Dr. Okazaki is a cardiologist and clinical geneticist specializing in mitochondrial diseases, bioinformatics and statistical genetics. She has led genetic analyses for large Japanese mitochondrial disease cohorts and developed novel statistical methods for variant annotation and digenic inheritance detection. Her work has been widely published in leading journals and she has received several awards, including the Young Investigator Award from the Japanese Circulation Society and the Clinical Research Scholar Award from Harvard Medical School. Dr. Okazaki's research advances the integration of statistical genetics into clinical diagnostics to improve the understanding and management of rare genetic diseases.
