

Meng Wang, MD, PhD, is a Research Fellow in the Signature Research Program in Cardiometabolic Diseases at Duke-NUS Medical School, Singapore. He focuses on clinical and translational research in metabolic diseases, with a strong emphasis on branched-chain amino acids (BCAAs) as a therapeutic target. He has authored 12 peer-reviewed publications in journals such as *Theranostics*, *Circulation Research*, *EBioMedicine*, *Heart Rhythm*, and *Basic Research in Cardiology*. He is a recipient of the Duke-NUS-Khoo Postdoctoral Fellowship Award and the 1st Place Poster Award at the 2024 Annual Meeting of the Taiwan Circulation Research Society.
